Okay. Now the how to read. In this manual you will sometimes find words you think: What is this word. To explaing this the first time this word will be found it's looking like this: *difficult word*[romain number].
Where [romain number] indicates the location in the reference chapter.

At the end of this manual there is a reference for all these words, see *chapter **4 References** on page 8*. There is a small explenation what it means. When pressing the word you will be brought to this page.
When you click on the romain number at the reference page, it brings you back to where you came from.
